

Mississippi Oyster Gardening Program

Growth Monitoring Form

Randomly select and measure in millimeters 10 to 20 oysters using the calipers provided. Measurements are taken from the hinge to the lip (see red arrows below). The more you measure, the better the accuracy.

You can record your data in the table on the next page, or on the digital form on the website (www.msogp.org/resources). Data submissions using this form can be done by mail, fax, or e-mail (see below for contact info). If you have any questions don't hesitate to call. The more often you measure the better your curve will be for your area.

DATA SUBMISSION OPTIONS

E mail: oystergardening@masgc.org

Fax: 251.438.5670

Mail: 118 North Royal Street, Suite 800, Mobile, AL 36602 Attn: Oyster Gardening

- **Make sure you include your name, date and location (Gautier, Ocean Springs, Bay St. Louis, etc.)**
